What is Ardsley Hacks?

Ardsley Hacks is Ardsley's third annual high school hackathon that aims to encourage students to take an interest in coding. We'd love to see your company become our next sponsor!

Why sponsor us?

Hackathons are a great way for companies to meet some of the most talented and innovative makers and developers. Whether your company is looking to advertise their services, reach out to more users, or even recruit some developers, ArdsleyHacks is the perfect way for you to reach out!

Your contributions allow Ardsley Hacks to provide our attendees with food, shirts, and other expenses that go with running a hackathon.

Custom Sponsorship:

We would love to discuss how we can fit your needs if our tiers don't fit your vision for sponsoring Ardsley Hacks. We are not only looking for monetary sponsorship, and together, we can work on providing you with the best sponsorship experience.
